BOOKSHELF

In brief

An app for an interactive educational library, useful for classifying, indexing and sharing training resources in any format (word, excel, power point, pdf, etc). The purpose of this tool is the crossing, collection, indexing, sharing and total management of the company's educational resources. It also allows you to capitalise on training investments.

What is it?

Bookshelf is an app designed for the management and sharing of a company's resources in any format, via social networking. This tool not only enhances a logical and functional organisation of training materials which are then available for the whole company but it also allows you to create communication and make groups based around that content.

What is it for?

- creating a personal educational library
- making communities (based in particular on themes and common interests)
- managing the company's books in the library in an optimal and innovative way
- encouraging storytelling
