SKILLA LIBRARY +

In summary

SkillaLibrary + is a catalogue of multimedia training pills on soft skills. It has been designed for all corporate employees and for individual professional families.

What is it?

It is an eLearning solution consisting of over 200 short multimedia learning paths designed, among other things, for populating corporate environments with training content.

The characteristics of multimedia training pills enable continuous, immediate, usable and effective training. SkillaLibrary+ facilitates blended learning design, as the pills can be used effectively in the pre- and post-classroom phases.

What is it for?

SkillaLibrary+ has been designed to:

- train all corporate employees while reducing the time and cost involved
- create customised paths and support assessment, development and training processes
- populate corporate environments with effective training content or have them immediately available in the cloud
- encourage and promote self-training
- have courses available that can be associated to specific professional groups or used to create blended paths
