

E-LEARNING PLATFORMS

In brief

Streamlined, usable technological environments, which incorporate pleasant, interactive, engaging online courses. Starting from the technological base of Moodle, highly functional didactics and high-impact graphics ensure effective and continuous use.

What is it?

Made to measure e-learning platforms, with highly functional didactics and high-impact graphics (and at a low cost), starting from the technological base of Moodle. The strength of a technology that is used by millions of users all over the world and an active, lively community join together with Ax's experience to create content and environments for e-learning.

What is it for?

- inserting online courses and viewing their progress
- mapping content
- equipping classrooms
- communicating with customers' master data
- guaranteeing usability and pleasure
