

LEARNING PLAN

In brief

Software designed to facilitate the construction and sharing of training programmes, obtained by combining multiple didactic methodologies, for a truly blended education. The app supports the designer in the creation and planning of the training course, from the choice of the most suitable methods to the schedule of the days and hours.

What is it?

An app for creating personalised training programmes. It can be used both by the designer for the creation and planning of the training course, and by employees for making plans for self-development.

It is a tool that has been created for making true learning Architectures, suitable for the company's and employees' needs.

What is it for?

- facilitating the communication of internal training programmes
- allowing blended training
- planning and organising work
- guaranteeing maximum personalisation
